

ABOUT

I am passionate about everything that is high-tech and design. I worked as a developer, consultant, architect, expert, trainer and even software craftman coach.

WORK EXPERIENCE

Craftsman developer

June 2017 - Dec 2017

VENTE PRIVEE

- Restructured and Simplified the software factory to deliverer better quality faster
- Redesigned build pipeline on existing **React Js** applications to get fast feedback & improve quality
- Introduced new functional programming for web applications using **F# and Fable**
- Trained team members to functional programming in **F#**

Migrating to Amazon Webservices (IaaS)

June 2016 - Dec. 2016

SOCIETE GENERALE

- Migrated current architectures towards Amazon Web Services
- Redesigned Jenkins build pipeline in accordance with the principles of **continuous delivery & infra as code** using many tools :
 - AWS tools: Code Deploy, Lambda, EC2, Auto-Scaling, ELB, Cloud watch, Route 53
 - HashiCorp tools: Packer, Terraform
- Succeeded making Société Générale the first European finance bank to have applications on a public cloud.

Software Craftmanship Coach

Jan 2015 - June 2016

SOCIETE GENERALE

- Trained many teams to use tools like **Git, Jira** or **Sonar**
- Coached & instructed teams on techniques of **TDD, BDD, Clean Code** and **Refactoring**

Software Architect

May. 2013 - Dec 2013

VINCI CONSTRUCTION FRANCE

- Collaborated with two other software architects to design a **composite WPF application**
- Supervised a team of five developers using agile method
- Designed an architecture to take into account several technical constraints such as offline mode, resynchronization of data & multi-user mode

Mobile developer

Jan. 2013 - May. 2013

ISAGRI

- Designed a solution using the capabilities of modern smartphones & tablets
- Created the Cross-platform application with **PhoneGap/Cordova** & **jquery mobile** frameworks
- Reached an offline mode and resynchronization of data through Services Discovery like **Bonjour**

Architect

Jan. 2012 - Dec. 2013

AEROPORT DE PARIS

- Created a proposal awarding a public bid & participated in the development of the project.
- Designed some applications to create & analyze surveys composed of:
 - A frontend solution relying on **jQuery mobile, KnockoutJs**, featuring an **Offline mode & data synchronization**
 - A backend solution allowing the administration of a varied data referential developed in **ASPNET MVC & SQL Server**
 - A WYSIWYG form editor using the **AngularJs** framework.

Architect and developer

Aug. 2011 - Nov. 2011

RESEAU FERRE DE FRANCE

- Standardized the exchange of services through an ESB
- Developed an ESB solution relying on **WCF Routing services**
- Extended ESB by creating an extension allowing the validation of **Contract First** type exchanges using XML schemas
- Optimized network bandwidth through installment of a distributed cache system **App Fabric**
